

IN THE CLAIMS

1. (Currently Amended) A cushion comprising:
a cover having a selected contour; and
a core disposed within said cover, said core comprising a volume of separate compressible particulates and polymer particles and an oil disposed between the particulates and polymer particles for enabling lubricated movement of the particulates and particles, with respect to one another in response to an outside force applied to said cover, said core further comprising a ~~foamable~~lean insitu foamed elastomer dispersed throughout said core.
2. (Currently Amended) The cushion according to claim 1 wherein said cover is stretched to the selected contour by the ~~foamable~~insitu foaming of the elastomer within the core.
3. (Original) The cushion according to claim 1 wherein said cover is molded to the selected contour.

Claims 4-21 cancelled

22. (Currently Amended) A cushion comprising:
a sheet stretched to a selected contour;
a backing; and
a core disposed between ~~said sheet and said backing~~ and comprising a mixture of compressible particulates, polymer particulates and a liquid, said core further comprising a ~~foamable~~lean insitu foamed elastomer dispersed throughout the core.
23. (Original) The cushion according to claim 22 wherein the particulates comprise open cell foam particles.
24. (Original) The cushion according to claim 23 wherein said liquid is partially disposed within said open cell foam particles.
25. (Cancelled)
26. (Cancelled)

27. (Cancelled)

28. (Original) The cushion according to claim ~~27-22~~ wherein said liquid comprises an oil.

Claims 29-35 cancelled.
